It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

Title page,

Item [57], **ABSTRACT**, delete in its entirety and replace with the following:

-- The gas separator fixing structure of the present invention is characterized in that it is provided with a gas separator 10 having a gas separation membrane 30 formed on at least one surface of a tubular support 31 having a through hole 7 in axial direction and comprising porous ceramics, a cap-like metal member 1 and a ring-shaped metal member 4 are fixed to one and the other open end of the gas separator 10 through seal members, respectively, and seal members are gland packings 11 and 12. A gas separating device can be provided with causing hardly the breakage of the tubular support constituting the gas separator 10 due to the thermal stress and the reduction of air-tightness between the gas separator 10 and the supporter supporting the gas separator due to load of heat cycles, and besides which can be used even under conditions of high temperatures. --.
